

HBOC & PGT FACTS

Did You Know??

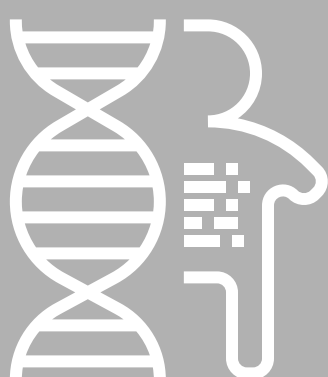

5-10%

of breast cancers in women
are thought to be due to
genetic mutations

WOMEN

GENOME-WIDE

110

target genes have been
identified that may
influence the risk of
hereditary breast cancer

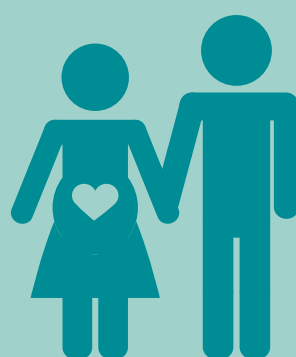

<https://www.nature.com/articles/s41467-018-03411-9>

1 in 4

BRCA-positive women are
interested in using IVF with
preimplantation genetic testing
(PGT-M) to start a family

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4122483/>

IVF with PGT

INVESTMENT

\$500M

amount of money the
National Institutes of
Health spends *per year* on
breast cancer research
